

Introduction to Composite Fabrication Training

Description:

This 8-week basic composites fabrication program is intended for people who are seeking employment in the composites industry. The program will introduce students to various composite fabrication processes, materials and techniques while focusing on safety. Instruction format will include classroom lectures, video presentations and practical demonstrations of procedures in a lab or industrial setting. Students will have hands-on experience fabricating items from composite materials. Learn from industry experts and get hired by a local company!

Am I eligible?

- This training is funded by the Province of Nova Scotia
- You are eligible for this program if you are unemployed or underemployed

Free tuition

Where can I work?

Many local companies, in these sectors, will hire grads who meet their minimum hiring requirements:

- Aerospace
- Boat building
- Composites fabrication

Guaranteed jobs
